## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Hattori (JP 11-143067 in view of its English language abstract).

Hattori discloses a resist composition containing monomers meeting the structural limitations of the instant claims (see column 72-74). Based upon a spot translation by a PTO staff member, it appears as though the composition comprises a crosslinking compound as instantly claimed, a thermal active compound and a photoacid generator in amounts falling within the scope of the instant claims limitations. The composition is employed in a method of forming a pattern meeting the instantly claimed method.
